DL is a group of companies with over 4,200 employees.

- DL Médica
- Grupo Industrial Poseidón
- Dentilab
- DLP Medical
- DLP Medical Products, Corp. (USA)
- Profilatex
- DLP Pharmaceutical
- DLP Medical Colombia
- DLP Medical Perú

Mission

Satisfy the needs of our customers with products that contribute to live a healthy life, with the commitment to do so with the highest quality.

Vision

To be recognized in the national and international market as a leading company in the manufacturing of health products.

Values

Quality, respect, honesty, commitment, responsibility, teamwork and trust.

Quality Policy

Corporativo DL is an organization dedicated to manufacture and commercialize medical devices. We are committed to fully satisfying the needs of our users by offering products of the highest quality. To achieve this, we continuously maintain and improve our Quality Management System, ensuring compliance with applicable requirements and striving to be a leading company in the field.

Gloves

A pioneering product in DL is medical gloves, used as a barrier against biological hazards and also reduce the risk of contamination. They are important medical devices that represent one of the main products in any medical, veterinary and dental speciality.

At DL we manufactured gloves with latex and nitrile for exam and surgery.

Blood Glucose Control

At DL, our main objective is to help you permanently monitor your glucose levels in the most innovative, practical and fast way. With Gmate®, this control and monitoring becomes a breeze. Either with ON or SMART you can turn your smartphone into a glucose monitoring system, or with Wheel that allows the handling of test strips in a more hygienic way.

Cytology Brush

For medical use, used for the collection of cells from the endocervical canal, it is manufactured with plastic filaments, distributed in a spiral shape and firmly attached to a wire base that prevents their detachment. It is a disposable product made of 100% virgin Nylon 6.12, which guarantees safety and that it is free of any coloration. It consists of an octagonal shaped ABS handle, stainless steel wire and monofilament, it is individually packaged in a blister pack in sterile or non-sterile version.

Dental Brush

For oral hygiene. Manufactured with 100% virgin medical grade Nylon 6.12 filaments, rounded to prevent them from hurting the gums and in turn massaging them. The shape of the grouping of the bundles is such that it facilitates the cleaning of the oral cavity. Its bristles are soft of medium consistency, the filaments are firmly attached to the brush handle through a stainless metal anchor, which prevents them from detaching. The handle is anatomical, made of medical grade polypropylene which guarantees the toxicity and safety of the product. It is available in two sizes, children's with thinner filaments to avoid mistreating the infant's gum and adult with thicker filaments for better brushing.

Infusion Devices

At DL we manufacture a wide range of medical devices dedicated to the infusion and supply of parenteral solutions. Made from the highest quality virgin medical grade plastics as raw material for all our variety of IV Sets by gravity or through a DLP™ infusion pump and accessories such as extensions, stopcocks and connectors.

Connectors

Extensions

Gravity Infusion Sets

Infusion Pumps

Pump Infusion Sets

Stopcocks

Transfusion Sets

Connectors

At DL we manufacture connectors that allow direct union mainly from syringes or infusion equipment, without the use of needles; They are covered on the inside by a silicone protector that retracts at the time of connection, which allows it to function as a barrier.

Extensions

DL manufactures extension tube as an accessory to provide greater length, attaches to an IV line or other delivery line for fluid delivery, allowing greater mobility with the equipment to which it is attached. It is manufactured with different types of plastic, 100% virgin medical grade, transparent or translucent that allows the interface of air and water to be observed with the naked eye during the passage of air bubbles, hermetically attached to a female connector at the end of the tube. At the other end it has a male connector with a movable closure attachment, with a thread to assemble.

Gravity Infusion Sets

Our DL IV set can be peripheral or central, continuous infusion of fluids. Available in several presentations: Macrodropper (between 28 and 32 drops per minute), Microdropper (56 to 64 drops per minute), Measured Volumes (100ml of capacity in Burette) and in needle-free versions of insertion sites. Manufactured with medical grade plastic, DEHP free, sterile and disposable.

Stopcocks

Our three-way and four-way DL stopcocks are made of medical grade plastic, they are used for flow control. They consist of a moving part, a fixed piece with 3 or 4 strands, protective wrench plugs and removable extension tube, they have a Luer-lock attachment on the wrench branch that connects to the extension hose. They are sterile and have marks indicating the direction in which the solutions flow and the closed position.

Latex Catheters

Manufactured with natural latex rubber, our line of drainage probes offers a broad portfolio for urine or bile, with various sizes, capacities and models to cover the physical spectrum of patients. DLP latex catheters are sterilized with EO.

2-Way Foley Balloon Catheters

3-Way Foley Balloon Catheters

Kehr Tubes

Nelaton

2-Way Foley Balloon Catheters

Our 2-way Foley type urological probes contain two branches, the lateral one to inflate the balloon and the central one to allow normal drainage. They have self-sealing type diaphragm valve, with universal female luer inlet firmly seated in the tube. When the balloon is filled or inflated to its design volume, it fulfills its self-retentive function. 9 Gauges available (Fr) 3, 5 or 30 ml self-locking balloon volumes.

Peripheral IV Catheters (PIVC)

DL's Peripheral IV Catheters are manufactured with medical grade plastic materials, non-toxic with stainless steel needles. They are sterile, disposable, pyrogen-free. The catheter is made of fluoropolymer (INCATH) and Polyurethane (DLP) material with radiopaque lines. The hypodermic introducer needle has excellent finishes and angles that ensure easy penetration, reducing pain for the patient. They have a translucent medical-grade plastic female connector that acts as a visual reflux camera, they also have a protective cap to ensure that there is no damage to the needle and catheter when transporting, storing or distributing.

Sterilization

DL manufactures medical-grade paper sterilization bags with 2 brands: DL and Esteribol, smooth with controlled porosity and hermetic seal. Our bags are used to act as a bacterial barrier and keep the items inside sterile after they have undergone a sterilization process by steam, formaldehyde or EO gas. They also have an opening system that allows the bag to be easily opened in the operating room. The closure of the top is heat-sealable, the bottom of the bag is sealed with a thermo-adhesive and has two folds across the entire width, each glued with a non-corrosive water-resistant adhesive. The back side of the bag has a non-corrosive, water-resistant adhesive and is made up of a two-strip system of coloured adhesive. On both sides it has information marked with indelible ink. It also has a non-corrosive water-resistant dual indicator that allows you to see if it has been subjected to a sterilization process.

Surgical

Our products used in the operating room offer great support for medical staff, providing quality devices manufactured in Mexico.

Disposable Razors

Penrose Tubes

Surgical Blades

Suction Tubes

Disposable Razors

Manufactured with medical-grade high-impact polystyrene. Our surgical razor is disposable, non-toxic, with a corrosion-resistant stainless steel blade and with an optimal edge. Used in pre-surgical preparations, in general surgery or high specialty. It has a single blade to prevent it from clogging and not cutting. It has blunt-edged teeth.

Description	SKU	Presentation	Box
DISPOSABLE RAZORS WITH ONLY ONE BLADE. PIECE	RASTP	BOX W/300 PCS	1 BOX

Brand: DL

Manufactured by: DL Médica

Penrose Tubes

Our Penrose tube is a medical device manufactured with natural, radiopaque rubber, used for the systematic removal of fluids and general waste after surgery. Disposable and sterile.

Suction Tubes

Our amber rubber latex suction tubes are used in the medical area to gastric and pleural suction. They are a medical item, reusable, non-sterile, made in one piece with amber medical grade latex material. They are sterilizable and have a uniform thickness on their walls and have a smooth finish surface and their surfaces are inert to avoid any type of reaction.
